RE: Use of MasterTech Replacement Stain Kit Components

Please be advised that any StatLab MasterTech Stain Kit Component can be purchased separately and used to replace components that have either been exhausted or have reached their expiration date, provided that the replacement component is the same Item Number and/or Name as that contained originally in the kit as received.

Replacement kit components are manufactured to the same ISO standards as were the original kit components and are designed to perform seamlessly with the remaining components of the stain kit.

Please contact the StatLab Technical Service Department at 1-800-442-3573 X5, or on our website at [www.StatLab.com](http://www.StatLab.com) if you require assistance in selecting the correct replacement MasterTech Stain Kit Component. As always, all of us at StatLab very much appreciate the confidence you place in our company and in our products.
