

FLEXIBLE KEYBOARD

What's Growing on your Keyboard?

- HIGH QUALITY SILICONE
- EASY TO CLEAN
- EASY TO INSTALL
- DUST PROOF

With flus, colds, and allergies an ever present thing, having a clean keyboard in your lab or office is essential. Some experts have concluded that these dangerous germs can be harbored on keyboards for as many as 24 hours. For those working in a lab or hospital, this threat is even more prevalent. That is where the Flexible Keyboard, comes in to help. This keyboard can be washed with soap and water or disinfectant wipes, allowing it to be disinfected. Made of high quality silicone, the flexible keyboard can withstand a beating. The keyboard can be cleaned with soap and water, but it's also resistant to substances such as coffee, tea, and dirt. Hooks up with a USB cable (provided) and is ideal and light enough for travel. It's been said that over 50% of keyboards contain traces of urine and have 67% more germs per square inch than a toilet, with the Flexible Keyboard you can avoid this. So, what's growing on your keyboard?
