Stop the Spread of Germs and Viruses!

Finally, a washable and completely waterproof, sanitary keyboard and mouse for the lab!

- 100% COATED SILICONE
- EASY TO INSTALL
- DUST PROOF
- QUIET

With the flu, cold, and allergy season approaching, having a sanitary keyboard and mouse in your lab or of fice is essential. Many experts have concluded that dangerous germs can be harbored on keyboards and mice for as long as 24 hours. For those working in a lab or hospital, this threat is even more prevalent. That is where Kleen Keys saves the day. This new, rigid keyboard and mouse can be washed with soap and water or disinfectant wipes. The low-profile, concave keys, make it hard for germs to hide and help reduce negative stress while typing. Statistics show that over 50% of keyboards contain traces of urine and have 67% more germs per square inch than a toilet. Avoid working in this infectious environment with Kleen Keys. What's growing on your keyboard and mouse?
