

Monoclonal Antibody to **PNEUMOCYSTIS carinii**

Technical Data Sheet

Reagent Category

Monoclonal primary antibody to
PNEUMOCYSTIS carinii

Antibody Formats Supplied

- 7 ml of anti **PNEUMOCYSTIS carinii**, Ready-To-Use
- 0.2 ml of anti **PNEUMOCYSTIS carinii**, Concentrate

PRODUCT# IMI28761E (Ready-To-Use)

PRODUCT# IMI28752E (Concentrate)

SOURCE: Mouse ascites fluid

IMMUNOGEN: *Pneumocystis carinii* isolates from several species

IMMUNOGLOBULIN ISOTYPE: IgG1

CLONE: 3F6

REACTIVITY

This mouse anti *Pneumocystis carinii* antibody is a purified preparation from mouse ascites fluid, this antibody is reactive with *Pneumocystis carinii* from a variety of species. When using this antibody on animal tissues, the use of Innovex Background Buster (product# IMI01172E) for blocking step is highly recommended. Blocking with Innovex Background Buster will eliminate and/or reduce background staining that is often observed with animal tissue staining. Furthermore, it makes staining of same species antibody in same species tissue possible, e.g. mouse antibody on mouse or rat tissue. This antibody is suitable for use on routinely fixed paraffin embedded and frozen sections and it is compatible with formalin fixed tissues.

POSITIVE CONTROL TISSUE: Lung infected tissue

STAINING PATTERN: Cytoplasmic

Antibody FORMAT, DILUTION and INCUBATION time

This affinity purified monoclonal mouse anti *pneumocystis carinii* ascites antibody is provided in phosphate buffered saline pH 7.2 containing bovine serum albumin (BSA) and 0.05% sodium azide.

7 ml of Ready-to-Use, Do not dilute. Incubate for 30 minutes for paraffin sections. This antibody best stains when formalin fixed paraffin embedded sections are retrieved.

For Background-Free, gentle retrieval, Innovex Uni-Trieve (60°-70°C) universal retrieval solution is highly recommended. To retrieve with Uni-Trieve: Warm up water bath to 60°-70°C and fill a slide holding container with Uni-Trieve solution. Place slides in a slide rack and immerse slides in a vessel or a coplin jar containing Uni-Trieve solution, bring the solution and slides to 60°-70°C and let slides incubate at 60°-70°C for 30 minutes. Rinse slides with 2 quick changes of water; No cooling period is required. Proceed with immunostaining.

0.2 ml Concentrate. Dilute 1:50-1:00 for 30-minute incubation. For longer incubation time the titer may be higher and it must be determined by the end user. **This antibody best stains when formalin fixed paraffin embedded sections are retrieved.**

For Background-Free, gentle retrieval, Innovex Uni-Trieve (60°-70°C) universal retrieval solution is highly recommended. To retrieve with Uni-Trieve: Warm up water bath to 60°-70°C and fill a slide holding container with Uni-Trieve solution. Place slides in a slide rack and immerse slides in a vessel or a coplin jar containing Uni-Trieve solution, bring the solution and slides to 60°-70°C and let slides incubate at 60°-70°C for 30 minutes. Rinse slides with 2 quick changes of water; No cooling period is required. Proceed with immunostaining.

The above dilutions and incubation times were derived by the use of Innovex STAT-Q and HISTO-STAT staining systems. For less sensitive detection systems above dilution factors may vary and they should be determined by the end user for specific detection system employed.

CONTINUED OVER

APPLICATIONS

This antibody is intended for use in immunolocalization of *Pneumocystis carinii* by a variety of immunoassays such as Immunochemistry, fluorescent labeling, ELISA, Immunoblotting and dot blotting. In immunochemistry, this antibody can be used in staining routinely fixed paraffin embedded or frozen histological sections of human or animal tissues for the purpose of qualitative localization of *pneumocystis carinii* in human or animal tissues. This antibody can also be used for quantitative flow cytometric assays in the indirect method.

SPECIES REACTIVITY

This antibody is reactive with *pneumocystis carinii* in human and a variety of species.

STORAGE CONDITIONS

Store in refrigerator at 2-8°C through expiration date noted on the vial.

IMPORTANT NOTE:

The interpretation of test results is the sole responsibility of the end user.
